

**Table S1***Pearson Correlations Between Demographics, Mood, and Work Outcomes (N = 129): Work Status and Work Functioning*

	Work Status (Working/Not Working)	Work Functioning (LFQ-W)
Demographics		
Age	0.18*	0.07
Education	0.13*	-0.11
Nonmajority	-0.02	0.01
Gender	0.03	0.08
Mood		
BDI (depression)	-0.37**	0.53**
ASRM (mania)	-0.22*	0.30**
Work Environment		
Conflict at work	-0.23*	0.56**
Exclusion at work	0.40**	-0.38**
Social support	0.33**	-0.39**
Stigma impact on keeping a job	-0.47**	0.37**
Stigma impact on everyday work	-0.45**	0.46**

Note. LFQ-W = Life Functioning Questionnaire, work subscale. BDI = Beck Depression Inventory. ASRM = Altman Self-Rating Mania Scale.
